Preface

This document provides a general overview of the Account self-care interface and the configuration for your phone line.

Where to get the latest version of this guide

The hard copy of this guide is updated upon major releases only, and does not always contain the latest material on enhancements that occurs in-between minor releases. The online copy of this guide is always up to date, and integrates the latest changes to the product. You can access the latest copy of this guide at: www.portaone.com/support/documentation/.

Conventions

This publication uses the following conventions:

- Commands and keywords are given in **boldface**.

Exclamation mark draws your attention to important information or actions.

NOTE: Notes contain helpful suggestions about or references to materials not contained in this manual.

Timesaver means that you can save time by taking the action described here.

Tips provide information that might help you solve a problem.

Trademarks and Copyrights

PortaBilling®, PortaSIP®, PortaUM® and PortaSwitch® are registered trademarks of PortaOne, Inc.

Hardware and Software Requirements

Client System Recommendations

- **OS:** MS Windows XP or above, Linux/BSD or Mac OS X 10.6 or above.
- **Web browser:**
 - Internet Explorer 8.0 or above, Mozilla Firefox 24 or above.
 - JavaScript, Java and cookies must be enabled.
- **Spreadsheet processor:** MS Excel, OpenOffice Calc, LibreOffice Calc or Google Sheets.
- **Display settings:** A minimum screen resolution of 1024 × 768.

1 ■ Introduction

Login to the Account Self-care Interface

Your ITSP will provide you with a URL and credentials for logging in to the account self-care interface upon subscribing to their services.

Overview

The account self-care interface was designed for end users to access their profile data, check billing information, make mobile payment transfers and, most importantly, manage their IP Centrex settings. The front-end design offers simple and intuitive navigation. This includes an easy-to-use structure of menus and controls, graphic icons and improved presentation of information.

For your convenience, the account self-care interface is divided into four tabbed sections:

- Dashboard (your home page)
- My Profile
- IP Centrex
- Billing Information

The screenshot displays the 'Account Self-Care Portal' interface. At the top, it shows the user's balance (1.14 USD), credit limit (100.00 USD), and language (en - English). The 'Dashboard' tab is selected, showing account details for AccountID: 16041235005 and Extension #: 7755 (Michael Turner). The interface is divided into several sections:

- Recent Calls:** A table with columns: Date/Time, From, To, Duration, Cost, USD, and Play. It lists three recent calls.
- Brief Billing Information:** A table with columns: Type, Credit, and a 'Recharge Using Voucher' button. It shows Balance (1.14 USD), Credit Limit (100.00 USD), Refunds (0.00 USD), and Non Call Related Charges (0.00 USD).
- Member of Huntgroups Information:** A section with a 'Group Name' field and a message 'There is no data to display'.
- Product & Discounts Information:** A section with 'Main Product' (SP Subscribers) and 'Add-on Product' (Start Plus). It includes a table with columns: Destination Group, Service, Peak Level, Threshold, Used, Current Discount, and Next Discount Level. A message 'There is no data to display' is shown below the table.
- Contact Information:** A section with fields for 'Contact' (Michael Turner) and 'Address'.

At the bottom, there is a pagination control showing 'Page 1 of 1' and '1 - 3 of 3'.

At the top of the interface you can always view billing information such as your balance information, web interface language, etc.

Common Features

Most of the data on the self-care interface is formatted like a page and sorted into columns. You can go to the next page or the previous page, jump to the first or last page, or use the  **Refresh** icon to update any of the pages. You can also change the number of columns and sort them in ascending or descending order by clicking your mouse on the name field of any of these columns. If you point your mouse at the name field you will see a triangle; click on it and a menu will appear. You can choose how to sort your data and add or remove columns by selecting or clearing check boxes in the menu:

Action buttons

The top right hand side of the interface provides you with the following information and actions:

- Your ID and a login name that was used to log in.
- The **Logout** button that terminates your current session on the web interface. Also, you can change your password here if necessary.

In order for changes to take effect when adding / editing information, you need to click the  **Save** icon on the appropriate page. If you do not want to save the information entered – just click **Cancel**.

2. Web Interface

Dashboard

Your home page is organized like a dashboard so that you can easily view the most important information separated by category into different panels. In addition, these panels can be moved around, rearranged or minimized as you wish.

You will see three **information panels** on the **Dashboard**:

The screenshot displays the 'Account Self-Care Portal' dashboard. At the top, it shows the account balance (1.14 USD), credit limit (100.00 USD), and language (en - English). The account ID is 16041235005 and the extension is 7755 (Michael Turner). The dashboard includes several panels:

- Recent Calls:** A table listing recent calls with columns for Date/Time, From, To, Duration, Cost, USD, and Play. The table shows three calls from 2014-04-02.
- Brief Billing Information:** A panel showing account balance (1.14 USD), credit limit (100.00 USD), and refunds (0.00 USD). It also includes a 'Recharge Using Voucher' button.
- Member of Huntgroups Information:** A panel showing the group name (Michael Turner) and a message 'There is no data to display'.
- Product & Discounts Information:** A panel showing the main product (SIP Subscribers) and add-on products (Start Plus). It includes a table with columns for Destination Group, Service, Peak Level, Threshold, Used, Current Discount, and Next Discount Level.
- Contact Information:** A panel showing the contact name (Michael Turner) and address.

Panel	Description
Brief Billing Information	This reflects thumbnail billing information such as your available funds (or balance), refunds and charges information. Balance information will only be displayed for phone lines which have an individual balance control.
Contact Information	Here you can view your contact info such as address, email, etc.
Member of Huntgroups Information	This shows whether your extension belongs to any of the huntgroups.
Product & Discount Information	Here you can find all the necessary information concerning your product and available discounts.
Recent Calls	This table lists the most recent calls and call details. It also gives you the ability to listen to recorded calls (if any were recorded).
Status	Indicates whether the phone is online or offline at the moment.

My Profile tab

The **My Profile** tab allows you to view and change your personal details such as contact information, personal info, password, etc.

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays the user's balance (1.14 USD), credit limit (100.00 USD), and login information (16041235005). The 'My Profile' tab is selected, showing a sidebar with options: General, Additional Information, Settings, and Change Password. The main content area is divided into sections: Personal Information (Company Name, Mr./Ms./..., First Name, M.I., Last Name), Address Information (Address, Province/State, Postal Code, City, Country/Region), Contact Information (Contact, Phone, Fax, Alt. Phone, Alt. Contact, E-Mail), and Other Information (Description). A 'Save' button is located at the bottom left of the form.

Tab	Description
General	Here you can enter general information such as company name, address, etc.
Additional Information	This is a list of additional fields. The fields for this tab are set by your provider.
Settings	Here you can choose the language to be used on your self-care interface.
Change Password	Here you can change your current password for the self-care interface.

IP Centrex Tab

This tab allows you to view your external numbers, and configure call screening, voice mail and other services.

General

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays the balance as '10.00 USD' and the user's login information: '12345678912 (Login: 12345678912)'. Below this is a navigation bar with links for 'Dashboard', 'My Profile', 'IP Centrex', 'Products Configuration', and 'Billing Information'. The 'IP Centrex' tab is selected, and the 'General' sub-tab is active. The 'General' section contains two fields: 'Associated Number' (a text input field) and 'Preferred IVR Language' (a dropdown menu currently set to 'en - English'). A 'Save' button is located at the bottom of the form. A sidebar on the left lists various services: General, DIDs, Phone Book, Dialing Rules, Incoming Calls, Forwarding, Call Screening, Call Logs, Conferences, Voicemail, Faxes, Auto Attendant, DISA, Call Barring, Identity, Music On Hold, and Emergency Calls.

Field	Description
Associated Number	This field may be used for various purposes depending on the services offered by your provider. Ask your service provider about how to use this particular option.
Preferred IVR Language	Here you can select the language you prefer for interacting with an IVR application.

DIDs (External Numbers)

In addition to being assigned your main phone number, you can have multiple alternate DID (direct inward dialing) phone numbers assigned.

Here you can find a list of available DID numbers (the numbers should initially be defined on the customer self-care interface or by your provider).

Phone Book

On the **Phone book** page you can maintain your own set of frequently dialed numbers, assign speed dial codes for them and define a list of favorite numbers.

Note, that this page is only active if your provider has enabled the **Phone Book** feature for you. Depending on your needs, you may activate / deactivate the **Phone Book** by selecting or clearing the check box on the top.

Speed Dial

The **Speed Dial** option allows you to assign speed dial codes to numbers. Please contact your provider to inquire about the maximum speed dial length.

Favorite Rating

If your provider makes the **Favorite Rating** service available, you have the option to mark which numbers will be charged according to a special rate. Ask your provider about the maximum amount of numbers that you can mark as favorite numbers and about the patterns to be used for favorite numbers.

Dialing Rules

On this page you can define a way of dialing phone numbers that is convenient to you.

The screenshot displays the 'Account Self-Care Portal' interface. At the top, there's a navigation bar with 'Dashboard', 'My Profile', 'IP Centrex', and 'Billing Information'. The 'Dialing Rules' section is active, showing a sidebar with various settings like General, Phone Book, Forwarding, and Voicemail. The main content area is titled 'Dialing Rules' and includes a dropdown for 'Dialing Rules: North America'. Below this, there are three main sections: 'Your location' with fields for country code (1), area code (604,778), and emergency numbers (911); 'Dialing Prefixes' with fields for outside line, domestic long-distance, international, and exceptions; and 'Service Features Codes' with fields for Park, Release, Group Pickup, Hide CLI, and Show CLI prefixes. A 'Check Yourself' section provides a summary of the dialing sequence for a given number (555-1234). A 'Save' button is at the bottom.

Your location	
Your country dial code:	1
Your area code(s):	604,778
Emergency numbers (e.g. 911, 112):	911

Dialing Prefixes	
Outside line dial prefix:	
Domestic long-distance dial prefix (outside of your area code):	2
International dialing prefix:	011
Exceptions (e.g. *98):	*98

Service Features Codes	
Park Prefix:	*70
Release Prefix:	*71
Group Pickup Prefix:	*40
Hide CLI Prefix:	*67
Show CLI Prefix:	*68

Check Yourself

You are going to call: 555-1234

To call within your local area you dial: 555-1234

To call long distance (within your country, 123 code) you dial: 2 123-555-1234

To call internationally you dial (to country with code 44 20): 011 44-20-555-1234

Save

By default, the Dialing Rules feature is disabled. This means that the system identifies calls arriving from a user as being in the E.164 format. If the Dialing Rules feature is enabled by your service provider, this will allow you to define various dial plan parameters such as an international dialing prefix or area code, feature access codes.

You can select one of the predefined dialing rules from the list.
To define your own translation rule select **Custom Rule** from the list.

Verify that for all examples provided (domestic and international calls)
this is how you want the numbers dialed and click  **Save**.

Service features codes (also known as Feature access codes)

Field	Description
Park Prefix	An end user can dial this access code to park a call. The default value is *70. This access code is available only if call parking is enabled for the customer.
Release Prefix	An end user can dial this access code to retrieve a call from the parked status. The default value is *71. This access code is available only if call parking is enabled for the customer.
Group Pickup Prefix	An end user can dial this access code to answer a call that arrives to the IP Centrex environment (customer's accounts) or the huntgroup this end user belongs to. The default value is *40. This access code is available only if group pickup is enabled for the customer and for the huntgroup.
Hide CLI Prefix	An end user can dial this code before dialing the phone number to prohibit the calling number from being displayed to the called party. The default value is *67. This access code is available only if Hide CLI is enabled for the account.
Show CLI Prefix	An end user can dial this access code before dialing the phone number to allow the calling number to be displayed to the called party. The default value is *68. This access code is available only if Hide CLI is enabled for the account.

Incoming Calls

Here you can set the parameters for incoming calls.

Field	Description
Default Answering Mode	This option specifies the method for processing incoming calls.
Ext-to-ext Call Distinctive Ring	For incoming calls from phones within the IP Centrex environment, use a ring pattern that is different from the default tone.
Caller Info	This option displays caller info for incoming calls (set by provider).
Call Waiting	Indicates the status of the Call Waiting function (set by provider).
Endpoint Redirection	This allows you to configure call redirection on your SIP phones (if this feature is supported by the SIP phone).

Forwarding

Forwarding allows you to redirect all calls to another telephone number.

What call forwarding does for you:

- Eliminates missed calls.
- Calls can follow you wherever you go.
- Eliminates waiting for important calls.
- Enhances home security when you are away.

There are several types of forwarding:

- Follow-me
- Advanced Forwarding
- Forward to PBX
- Simple Forwarding

Forward to PBX

This type of forwarding is only available when your provider has established the **Forward to PBX** mode for you. **Forward to PBX** allows to specify not only a destination phone number but also an IP address for calls to be forwarded to. This is useful when calls have to be routed directly to an external SIP proxy.

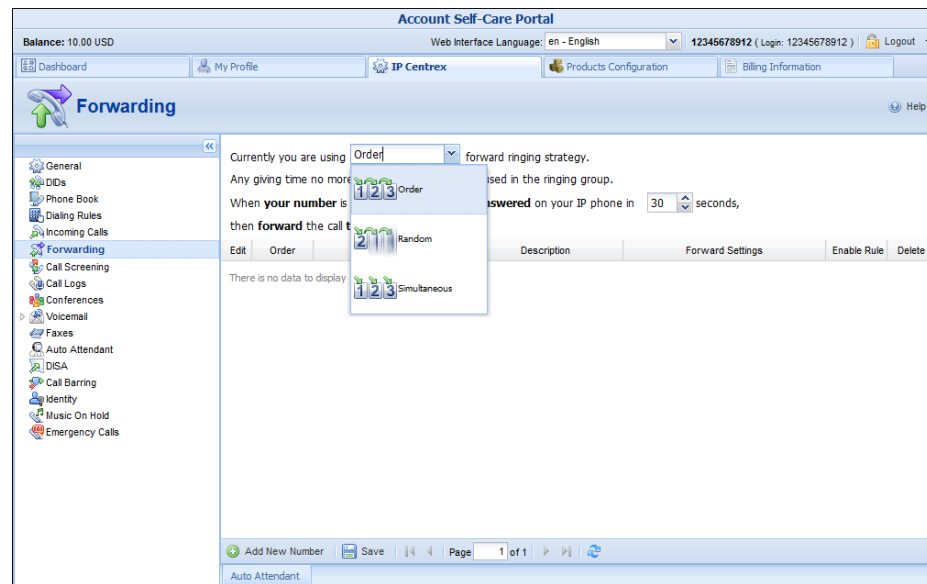

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays the balance as '10.00 USD' and the user's login information: '12345678913 (Login: 12345678913)' with a 'Logout' button. Below this is a navigation bar with tabs: 'Dashboard', 'My Profile', 'IP Centrex', 'Products Configuration', and 'Billing Information'. The 'IP Centrex' tab is active. On the left side, there is a sidebar menu with various options: 'General', 'DIDs', 'Phone Book', 'Dialing Rules', 'Incoming Calls', 'Forward To PBX' (which is highlighted), 'Call Screening', 'Call Logs', 'Conferences', 'Voicemail', 'Auto Attendant', 'Call Barring', 'Identity', 'Music On Hold', and 'Emergency Calls'. The main content area is titled 'PBX Forward To PBX'. It contains a 'SIP URI' field with the value '1818123555' and a dropdown menu showing '193.168.192.198'. At the bottom of the main area is a 'Save' button.

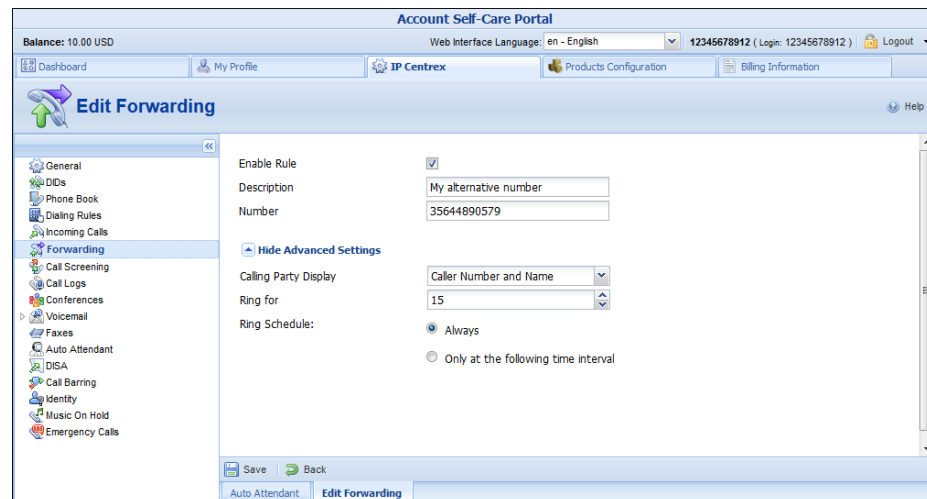

Follow-me

If the **Follow-me** option is set for you by your provider you can forward calls to multiple destinations. You can also configure it so that each of these destinations will be used during its own time period.

1. On the **IP Centrex** tab, select **Forwarding**.
2. Select the mode (**Order**, **Random** or **Simultaneous**) for your forwarded calls.

3. Click  **Add New Number**.

4. Enter the following information:

- **Number** – Enter a number for redirecting calls (e.g. 35644890579).
- **Description** – A short description for this number.
- **Ring for** – If a call is not answered, set the number of seconds that it will ring for until it is forwarded to the next number on the list.
- **Calling Party Display** – Choose how to display the caller's info during forwarding:
 - Select **Caller Number and Name** to see the phone number and the name of the original caller.

- If you choose **Caller Number and Forwarder Name**, then the phone number of the caller and the forwarder's name will be displayed.
- To see the phone number and the name of the forwarder, select **Forwarder Number and Name**.
- **Ring Schedule** – Choose the period during which the number is used.
 - If you select the check box next to **Always**, the call will always be forwarded (e.g. to your cell phone).
 - If you want to forward calls to a cell phone only during a specific time period, select the check box next to **Only at the following time interval** field and click the  **Period Wizard** icon to define that interval. Please see the [How to define a time period using the wizard?](#) section for information about how to use the Period Wizard.

5. Click the  **Save** icon to save the results of your work.

Forwarding

Currently you are using Order forward ringing strategy.

Any giving time no more than 30 numbers will be used in the ringing group.

When **your number** is called and the call is **not answered** on your IP phone in 30 seconds, then **forward** the call to :

Edit	Order	Number	Description	Forward Settings	Enable Rule	Delete
		35644890579	My alternative number	Ring Schedule: Always Ring for: 15 sec Calling Party Display: Caller Number and Name		

Add New Number Save Page 1 of 1

Auto Attendant

6. Repeat steps 2–4 until all the desired **Follow-me** numbers have been added.

Advanced Forwarding

This type of forwarding is only available when your provider has established the **Advanced Forwarding** mode for you. This is similar to the **Follow-me** mode, but has some extra options that allow you to route calls to SIP URI. To do this, follow the steps below:

1. In the **IP Centrex** section, choose **Advanced Forwarding**.

2. Select the mode (**Order**, **Random** or **Simultaneous**) for your forwarded calls.
3. Click  **Add New Number** to add the number that you wish to receive forwarded calls.
4. Enter the necessary information. The fields are very similar to those for adding a **Follow-me** number as described above, but additional fields that are not available when adding a **Follow-me** number are located below:
 - **SIP Proxy** – Select a proxy server from the list that forwarded calls can be routed to (the list of allowable SIP proxy addresses is managed by your provider).
 - **Keep Original CLD** – Select this option to ensure that the originally dialed number is present in the call information when forwarding a call to SIP URI.
 - **Calling Party Display** – Choose how to display the caller's info during forwarding:
 - Select **Caller Number and Name** to see the phone number and the name of the original caller.
 - If you choose **Caller Number and Forwarder Name**, then the phone number of the caller and the forwarder's name will be displayed.
 - To see the phone number and the name of the forwarder, select **Forwarder Number and Name**.
 - **Transport Protocol** – This enables you to choose the UDP or TCP transport protocol. You can use the TCP protocol instead of UDP for SIP communications with PBXs that do not support UDP.

The screenshot displays the 'Edit Advanced Forwarding' interface within the 'Account Self-Care Portal'. The top navigation bar shows the user's balance (10.00 USD), language (en - English), and login details (12345678912). The sidebar on the left lists various service options, with 'Advanced Forwarding' currently selected. The main configuration area contains several settings: 'Enable Rule' is checked; 'Description' is 'My alternative number'; 'Number' is '999000777'; 'SIP Proxy' is set to '193.168.192.198'; 'Transport Protocol' is 'UDP'; 'Keep Original CLD' is checked; 'Calling Party Display' is set to 'Caller Number and Name'; 'Ring for' is '15'; and 'Ring Schedule' is set to 'Always'. At the bottom of the form are 'Save' and 'Back' buttons.

5. Click the  **Save** icon to save the results of your work.

Simple Forwarding

The simplest type of forwarding is to specify a single phone number that all calls will be sent to (must be determined by your provider).

1. In the **IP Centrex** section, choose **Simple Forwarding**.
2. Enter the following information:
 - **Forward To** – The number you wish the calls to be forwarded to.

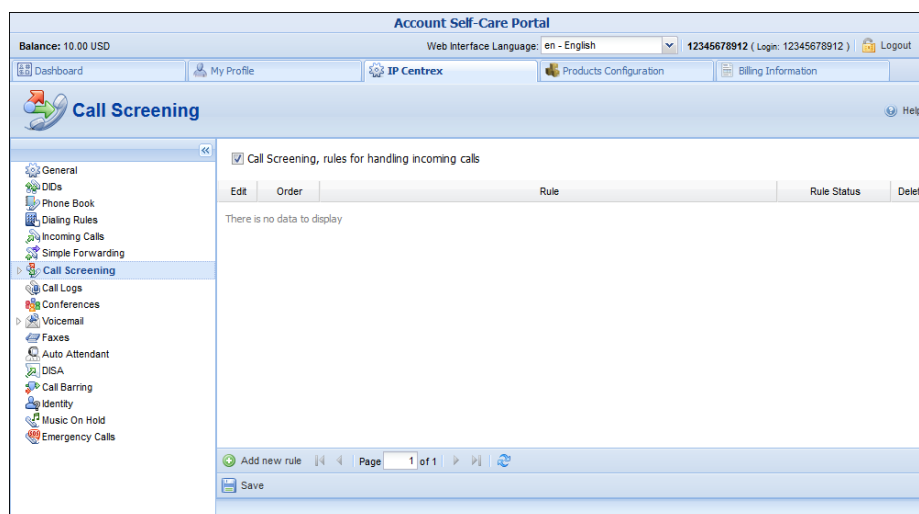

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays 'Balance: 10.00 USD', 'Web Interface Language: en - English', and a user login '12345678912 (Login: 12345678912)' with a 'Logout' button. Below this is a navigation bar with links: 'Dashboard', 'My Profile', 'IP Centrex', 'Products Configuration', and 'Billing Information'. The 'Simple Forwarding' page is active, showing a left sidebar with a tree view of settings: General, DIDs, Phone Book, Dialing Rules, Incoming Calls, Simple Forwarding (selected), Call Screening, Call Logs, Conferences, Voicemail, Faxes, Auto Attendant, DISA, Call Barring, Identity, Music On Hold, and Emergency Calls. The main content area has a 'Forward To' label and a text input field containing '999000777'. A 'Save' button is located at the bottom right of the main area.

3. Click the  **Save** icon.

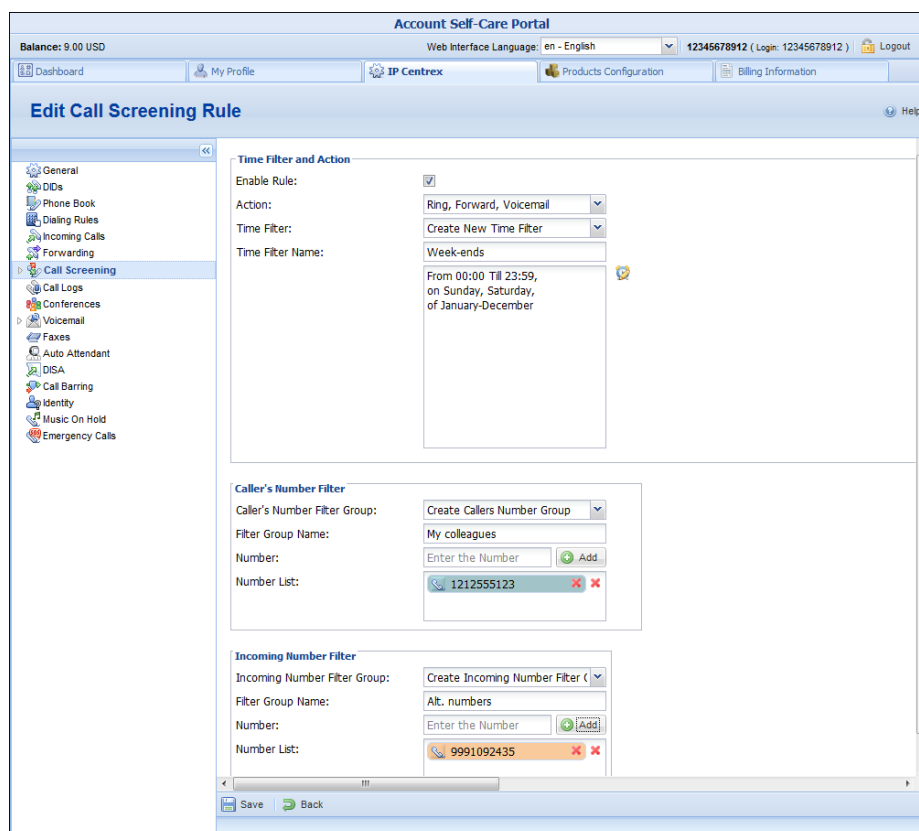

Call Screening

On the **Call Screening** page you can define and view a list of rules for handling incoming calls.

Note, that this page is only active if your provider has enabled the **Call Screening** feature for you. Depending on your needs, you may activate / deactivate **Call Screening** by selecting or clearing the check box on the top.

To add a new rule simply click the  **Add new rule** button at the bottom of the page.

Field	Description
Time Management and Action	
Enable Rule	Allows you to temporarily disable a rule without actually deleting it (so it can be used later on).

Action	Specifies which actions should be taken if a particular phone call satisfies the conditions for this rule.
Time Filter	Allows you to select a condition applicable to the time when a call is made.
Time Filter Name	Enter the name for a new time filter. If you want to set specific parameters for your time filter, click the  Period Wizard icon to define the interval. Please see the How to define a time period using the wizard? section for information about how to use the Period Wizard.
Caller's Number Filter	
Caller's Number Filter Group	Allows you to select a condition applicable to an incoming phone number (phone number of a person trying to contact you).
Incoming Number Filter	
Incoming Number Filter Group	Allows you to select a condition applicable to one of your phone numbers that a person tries to contact you.
<i>The following fields are similar to both Caller's Number Filter and Incoming Number Filter</i>	
Filter Group Name	Enter the name for the new filter group.
Number	Add the number(s) to your filter group. First enter the number and then click the  Add button.
Number List	The numbers you have added to the group are displayed here.

NOTE: If a user modifies already created filter groups then the changes are applied for all other call screening rules where these filter groups are used.

Call Logs

This page is only active if your provider has enabled the **Call Recording** feature for you. With the help of this feature, the users of IP Centrex services can record their phone conversations for later playback. On the **Call Logs** page you can view a list of recorded calls, listen to recordings and filter them for / from a certain period.

Depending on your needs, you may activate / deactivate **Call Recording** by selecting or clearing the check box on the top.

Edit Conference

General

Name: Sales Meeting

Maximum Participants: 3

Announced Conference Name: Please upload conference name 

Schedule

☒ Schedule the Conference at Specific Time

Time Zone: Europe/Prague

Start Time: 2014-11-06 Y-m-d 14 : 30 HH24:MI

Duration: 30 minutes

☐ Create a Permanently Active Conference

Access Codes

Moderator: 24072 

User: 02074

Options

☐ Video Conference

☒ Wait for Moderator

☐ Announce Joining or Leaving Participants

☐ Enable Music on Hold

Save Back

Edit Conference

Field	Description
Name	A description of your conference.
Maximum Participants	You can limit the maximum allowed number of concurrent connections to the meeting room. Note that you may not specify a higher value here than the Number of Simultaneous Participants assigned by your administrator to your account.
Announced Conference Name	Upload a sound file with the name of the conference as it will be announced to people joining it.
Schedule	Specify the date and time when the conference will start.
Duration	In order to prevent service abuse, you must specify the maximum allowed conference duration (in minutes).
Create a Permanently Active Conference	Maximum Session Time: If you are creating a “meeting room” (a permanently active conference), specify the maximum time that a single participant can stay in the conference. This is also done to prevent potential service abuse.
Access Codes	Access codes are created automatically, but you can generate a new set of codes by clicking the Generate button.

<i>Options</i>	
Video Conference	Enable it, if you want to have a Video Conference.
Wait for Moderator	If activated, conference participants will not be able to communicate with each other until the host (moderator) arrives.
Announce Joining or Leaving Participants	If activated, each participant will be asked to record his or her name initially. When he or she enters the conference, all the other participants will hear "... has joined the conference"; and when he or she leaves, the other participants will be informed of this as well.
Enable Music on Hold	Upload a sound file first if you want to use this option. When activated, the first conference participant will hear music while on hold until the second conference participant arrives and joins the conference.

Click the  **Save** icon. Now you can start the conference at the scheduled time. For this dial the conference access number from a phone and enter your access code. The same should be done by other participants from their phones.

When the conference is over, you can review the charges for the conferencing service on the **Transactions** page of the **Billing Information** page.

On the **Conferencing** page you may choose which conferences to display – current, future, etc. You may also make an extensible search using **Show Advanced Filter** in the top right-hand corner via:

- name of the conference
- conference **Start** and **End** time

Voicemail

On the **Voicemail** page you can configure your voice mailbox.

Note, that this page is only active if your provider has enabled the **Unified Messaging** services for you. Depending on your needs, you may activate / deactivate **Voicemail** by selecting or clearing the check box on the top.

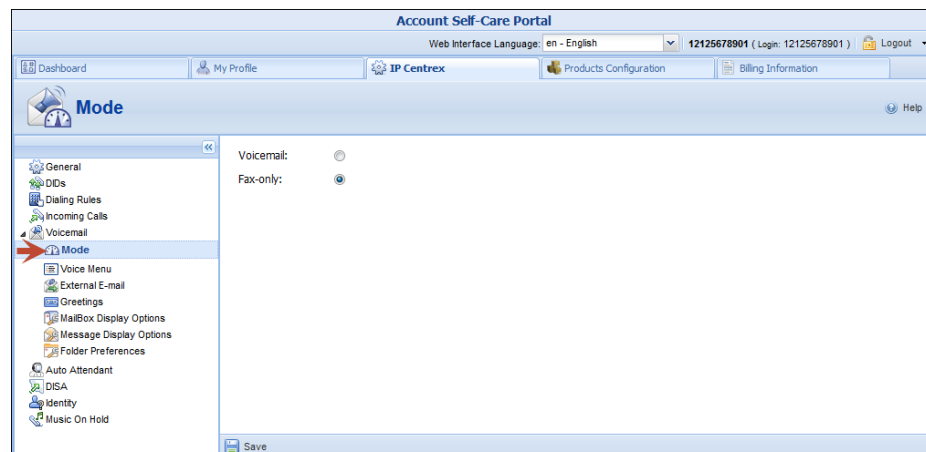

To check your mailbox, click the **Voicemail Inbox** button.

You will also find these tabs under **Voicemail**:

- **Mode**
- **Voice Menu**
- **External E-mail**
- **Greetings**
- **Mailbox Display Options**
- **Message Display Options**
- **Folder Preferences**

The **Mode** tab allows you to select the **Fax-only** or **Voicemail** mode for your phone line. When the **Fax-only** mode is selected (e.g. for a phone line that represents a DID number), every incoming call to this number will be answered with “start fax” tones, indicating that it will only receive fax messages. Thus the phone line will serve as a dedicated fax line, emulating the behavior of a legacy fax machine. When the **Voicemail** mode is selected for the phone line, this allows a caller to leave a voice message which can be listened to later.

The **Voice Menu** tab allows you to set options for your mailbox, such as:

- **Password**
- **Always Ask for Password**
- **Prompt Levels (Standard, Extended, Rapid)**
- **Announce Date & Time**
- **Auto Play**

The **External E-mail** tab allows you to forward messages to an external email box. When a new message arrives to your mailbox, a full copy of the message or simply a short notification can be sent to your other email address. To do this, specify an email address, define one of the actions (**Forward, Forward as Attachment, Copy, or Notify**), choose an appropriate voice message audio format and click  **Save**.

The **Greetings** tab allows you to customize your personal greetings for your voicemail. The **Standard** option is set by default. You may upload or record greetings specifically for **Extended Absence, Personal** and **Name**.

The **Mailbox Display Options** tab supplies with the following options:

- **Number of Messages per Page** – This defines the number of messages that will be shown in a given folder on a single page. If the folder contains more than this number, you will see “Previous” and “Next” links above and below the list, taking you directly to the previous or next message.
- **Enable Page Selector** – When you check this box, page numbers will be shown above and below the message list, allowing you to quickly jump to a specific message page.
- **Maximum Number of Pages to Show** – Defines the number of pages to be displayed above and below a message list.
- **Length of From / To Field** – Defines the number of characters that will be displayed in the **From / To** field. If you enter 0, then the full name will be visible.
- **Length of Subject Field** – Defines the number of characters that will be displayed in the subject field. If you input 0, then the full subject will be visible.

The **Message Display Options** tab:

- **Wrap Incoming Text At** – Defines how many characters to allow before wrapping text. This prevents messages from scrolling far off the screen. 86 is usually a good number to enter here, but you may change this as you desire.
- **Width and Height of Editor Window** – Defines how wide and high your message box will be. This indicates the number of characters per line you will be able to type before wrapping occurs in Compose.

- **Show HTML Version by Default** – If a message you receive is in both text and HTML format, you can choose to see the HTML version (Yes) or the text version (No) by default.
- **Include Me in CC when I Reply All** – “Reply All” sends a reply to all recipients of the original message, including yourself. To leave your own email address out, clear this check box.
- **Enable Mailer Display** – When viewing a message, this option displays which email service or client was used by the sender.
- **Display Attached Images with Message** – Displays the images attached to a message right as you view the message.
- **Enable Printer Friendly Clean Display** – Cleans up the message so the printed version looks nicer.
- **Enable Mail Delivery Notification** – Enables (or disables) automatic notification that a message has been delivered.
- **Prepend Signature before Reply / Forward Text** – Attaches the signature you defined under the Signature tab in Personal Information.
- **Sort by Received Date** – Sorts all the messages by the order they were received.

The **Folder Preferences** tab:

- **Trash Folder** – Specifies which folder messages will go to when you delete them.
- **Draft Folder** – Specifies which folder messages you save as drafts will go to.
- **Sent Folder** – Specifies the folder where sent items are saved.
- **Enable Unread Message Notification** – This option specifies how to display unseen (unread) messages in the folder list in your browser window. If you set this to **No Notification**, you will not be notified of unseen messages. If you set it to **Only INBOX**, the inbox heading will become bold when you have new messages, and a number will appear to the right of it indicating how many new messages are in it. If you set this to **All Folders**, the same will happen in all folders. If you notice that the folder list is loading very slowly, setting this to **Only INBOX** or **No Notification** should speed it up.
- **Unread Message Notification Type** – When new messages are in a folder, this option indicates whether to display the number of new messages only, or the total number of messages in that folder as well.
- **Enable Cumulative Unread Message Notification** – This controls the behavior of the message counter that is displayed next to each folder in the folder list. If the check box is selected and the folder contains sub-folders, then once it is collapsed, the message count will include all of the messages within all of the sub-folders of that folder.

- **Memory Search** – If you search a mailbox, the search can be saved for quick access later. This option defines how many mailbox searches will be saved.

Faxes

The **Faxes** tab gives you an opportunity to choose one of the output formats (**One PNG file per page**, **One TIFF file per page**, **Multipage TIFF file** or **Multipage PDF file**).

Auto Attendant

On the **Auto Attendant** page you can program your own set of menus for auto attendant, from a simple message such as “I am on vacation right now, press 1 to connect to my assistant” to a complex menu system with various options for small or medium-sized businesses. You can program the voice dialog from your web browser, record voice prompts using a microphone on your PC or upload professionally recorded prompts, create multiple sub-menus and define an activity period for each of them, program your company’s dial-by-name directory, construct multiple call queues, and so on.

Note, that this page is only active if your provider has enabled the **Auto Attendant** service for you (otherwise it will be grayed out). Depending on your needs, you may activate / deactivate the **Auto Attendant** by selecting or clearing the check box on the top.

Basic Concept

- The Media Server’s auto attendant is composed of a set of menus.

- All the menus are identical in every respect, except for the **ROOT** menu, which is always present and cannot be deleted, and whose name cannot be changed.
- When a caller dials the system, auto attendant will answer (connect) the call and proceed to the **ROOT** menu.
- If a user tries to access a menu which is not currently active, the action specified in the **Not Active** configuration parameter will be performed; for instance, the user may be automatically forwarded to an “after hours” menu.

Add / Edit menu

The auto attendant is composed of a set of menus. The main screen lists all the menus available. You can modify one of the existing menus by clicking the  **Edit** icon or by simply double-clicking the required menu item in the list.

To add a new menu, click the  **Add** button and enter the following information:

- **Name** – A descriptive name for the menu, i.e. ‘Sales’ for a sales department.
- **Active** – Time definition when the current menu is active.
 - To set the menu as always active, select the **Always** option.
 - To set the other time period, select **Only at the following time interval** and click the  **Period Wizard** icon. Please see the **How to define a time period using the wizard?** section for information about how to use the Period Wizard.

Prompts

After you have saved a menu, you can define the **Intro** and **Menu** prompts for it.

- The **Intro** prompt (e.g. “Welcome to PortaOne, a VoIP solutions company!”) is played when a user enters a menu for the first time.
- After this, the **Menu** prompt will be played, listing all the available options (e.g. “Press 1 for sales, press 2 for technical support”), and auto attendant will collect the digits dialed by the user on his phone touchpad.
- If no input is received, the **Timeout** prompt is played as many times as specified and the dialog reverts to the previous step (i.e. plays the **Menu** prompt and collects the user’s input).

To upload a prompt, click the **Browse...** button. The native audio file format for the system is the following:

Type: NeXT/Sun (Java) file .au
Format: G.711 u-Law
Attributes: 8,000 Hz, 8-bit, Mono

Type: NeXT/Sun (Java) file .au
Format: G.711 u-Law
Attributes: 8,000 Hz, 8-bit, Mono

Here's a short list of supported audio file formats:

Type	Description
.aiff	AIFF files used on Apple IIc/IIgs and SGI
.au	SUN Microsystems AU files
.gsm	GSM 06.10 Lossy Speech Compression
.mp3	MP3 Compressed Audio
.ogg	Ogg Vorbis Compressed Audio
.raw	Raw files (no header)
.wav	Microsoft .WAV RIFF files

To record a prompt, use the following buttons:

-  – **Record**. Select to start recording your voice prompt. (You will need to connect a microphone to your computer's sound card to use this feature.)
-  – **Stop**. Select this button to stop recording.
-  – **Play**. Select to play back the recorded prompt. When selected, this icon will turn into the  – **Pause** button.
-  – **Undo**. This becomes available when the existing prompt has been recorded over, allowing a rollback to the previous state.
-  – **Blinking play**. Indicates that the existing prompt is being overwritten, but changes have not yet been saved.

Each of the icons above may appear in grayscale, meaning it cannot be accessed because some other task is active.

To give your auto attendant a professional sound, we recommend using a professional speaker and a digital recording studio when recording voice prompts.

Actions

Edit	User Input	Action	Play Before Action	Play/Record Prompt
	1	Directory Announce Extension Numbers	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	2	Menu 'ROOT'	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Field	Description
Edit	Click the Edit icon to make changes in the action.
User Input	<ul style="list-style-type: none"> • Not Active – When the current menu is not active. • 0 – 9, #, * – User selection on telephone keypad. • Timeout – No selection received from user. • Fax – Fax CNG tone detected.
Action	See the description of available actions below, under the table.
	Provides additional information.
Play Before Action	Select this check box if the corresponding prompt is to be played before an action is performed.
Play / Record Prompt	File name and path for the prompt file.

The user's input will be matched with the corresponding menu items, and the action associated with this item will be performed. The following **actions** are possible:

- **Default** – Plays the **Default** prompt from the current menu and returns to the “Play Menu prompt” step (this is the action used for all menu items where the initial value has not been modified).
- **Transfer** – Transfers the call to a given telephone number or extension. The phone number should be entered in the same format as the customer would use to dial it from an IP phone in his IP Centrex environment; for example, to transfer a call to extension 123, simply enter 123.
- **Transfer to E.164 Number** – Transfers the call to a given number. The number should be specified in E.164 format: the country code, followed by the area code, and then the number (e.g. 16045551234 for Canada).

- **Dial extension directly** – Transfers the call to an extension number entered by the caller from his phone. The extension number should start with the same digit as the “Dial extension directly” option. To prevent abuse (e.g. someone attempting to enter a long-distance number in this way), you can specify the maximum allowed number of digits in an extension (**Max Size**).
- **Prompt for extension #** – You will hear the prompt to enter the extension number. You can specify the maximum allowed number of digits in an extension (**Max Size**).
- **Transfer to Voicemail** – Switches to voicemail mode. This should be designated as an action for the “Fax” event, in order to allow storage of received faxes.
- **Menu “ROOT”** – Transfers the user to the selected menu.
- **Directory** – Launches this company’s dial-by-name directory.
- **Disabled** – Cancels the action that was previously used for the current user input.

You may select whether the corresponding **Before Action** prompt is to be played prior to the action.

Input errors

On the **Input Errors** page you can record / upload the **Timeout** and **Unavailable Selection** prompts. For detailed instructions on how to do this, please refer to the Prompts section of this document.

You may also specify how many times the auto-attendant menu should be played when there is no input. The default value is 3.

The screenshot displays the 'Account Self-Care Portal' interface. At the top, it shows the user's balance (10.00 USD), language (en - English), and login details (12345678913). The main navigation bar includes links for Dashboard, My Profile, IP Centrex, Products Configuration, Billing Information, and Help. The left sidebar lists various system settings like DIDs, Phone Book, Dialing Rules, Incoming Calls, Forwarding, Call Screening, Call Logs, Conferences, Voicemail, Faxes, Auto Attendant, DISA, Call Barring, Identity, Music On Hold, and Emergency Calls. The 'Auto Attendant' section is expanded, showing sub-options for General, Prompts, Actions, and Input Errors. The 'Input Errors' tab is active, displaying configuration for 'On Timeout' and 'On Unavailable Selection'. Both sections have radio buttons for 'Custom' and 'None'. The 'On Timeout' section also includes a 'Replay Menu, Times' dropdown set to 3. Each section has a 'Please upload your prompt' text box and a 'Browse...' button. At the bottom, there are 'Save' and 'Back' buttons, and a breadcrumb trail showing 'Auto Attendant'.

DISA

The **DISA** (Direct Inward System Access) functionality allows you to make an outgoing call as if you were using your IP phone. For example, while on a business trip you need to make an international call. To do so, enable **DISA**, then dial the voicemail access number and choose the option for **DISA**, enter the password and then input the telephone number.

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays 'Balance: 10.00 USD', 'Web Interface Language: en - English', and the user's login information '12345678913 (Login: 12345678913)' with a 'Logout' button. The main navigation bar includes 'Dashboard', 'My Profile', 'IP Centrex', 'Products Configuration', and 'Billing Information'. The left sidebar lists various services: General, DIDs, Phone Book, Dialing Rules, Incoming Calls, Forwarding, Call Screening, Call Logs, Conferences, Voicemail, Faxes, Auto Attendant, **DISA** (highlighted), Call Barring, Identity, Music On Hold, and Emergency Calls. The main content area is titled 'DISA' and contains a checkbox for 'Enable DISA' which is checked, and a text field for 'DISA Password' with the value '654321123'. At the bottom, there are 'Save' and 'Auto Attendant' buttons.

Call Barring

On the **Call Barring** page you can prohibit outgoing calls to specific destinations.

Note, that this page will only be active if your provider has enabled the **Call Barring** service for you (otherwise it is grayed out). Depending on your needs, you may activate / deactivate **Call Barring** by selecting or clearing the check box on the top.

The screenshot shows the 'Account Self-Care Portal' interface for the 'Call Barring' page. The top navigation and sidebar are identical to the DISA page. The main content area is titled 'Call Barring' and features a checkbox for 'Call Barring, choosing destinations to block' which is checked. Below this is a table with columns 'Enabled' and 'Class of Phone Numbers'. The table contains two rows: '1 Premium SAR' and '2 Premium numbers', both with the 'Enabled' checkbox checked. At the bottom, there are 'Refresh' and 'Save' buttons.

	Enabled	Class of Phone Numbers
1	<input checked="" type="checkbox"/>	Premium SAR
2	<input checked="" type="checkbox"/>	Premium numbers

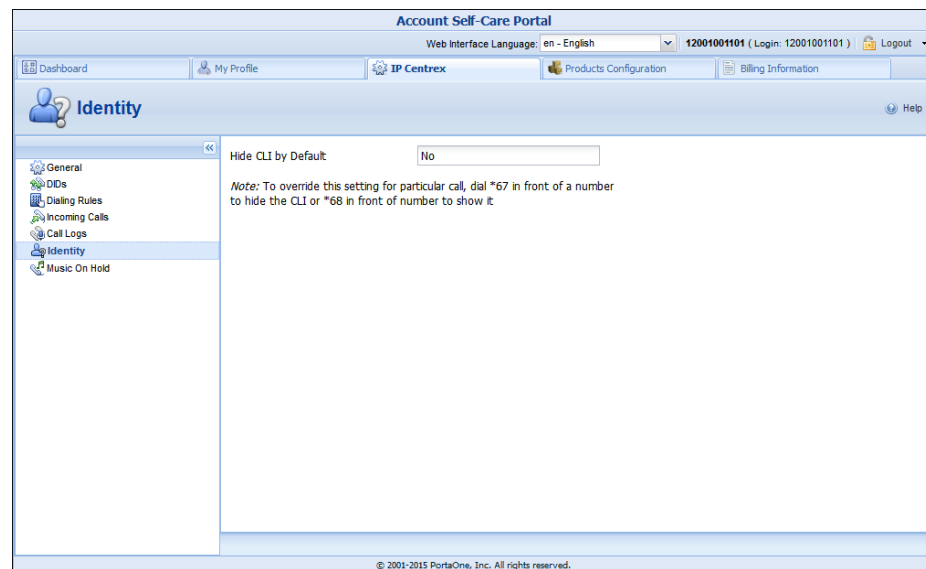

Identity

This page displays **Hide CLI by Default** status defined by your provider. The following options are available:

- **No** – Caller ID is shown by default.
- **Yes** – Caller ID is hidden by default.

Note that when making a call, you can dial the special feature access code before dialing the phone number to override the default setting.

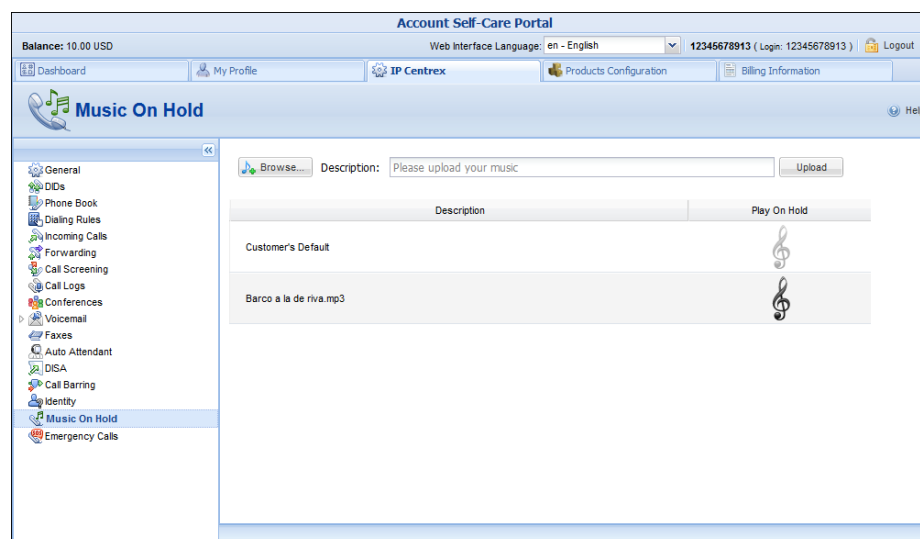

For more information, please see the *Service feature codes (also known as Feature Access Codes)* table in the **Dialing rules** section of this guide.

Music on Hold

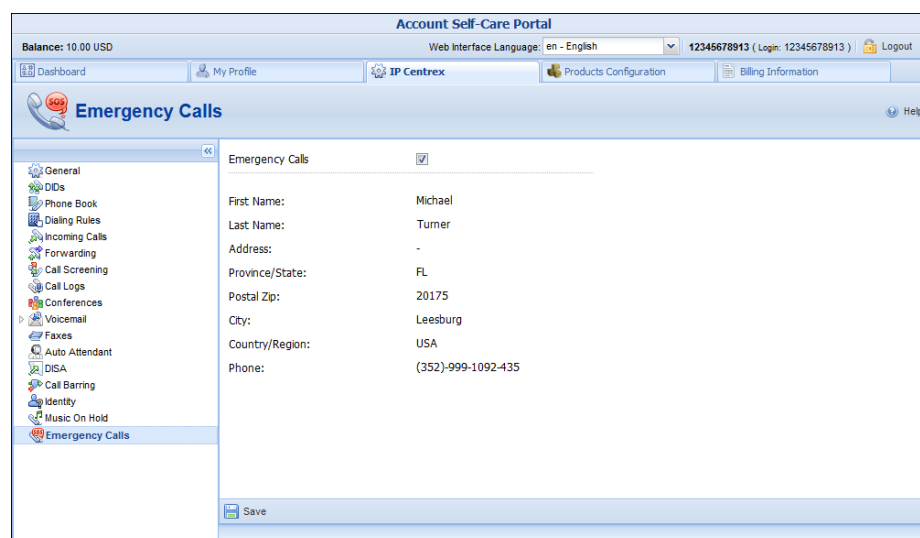

Here you can define which music will be used for calls on hold. To select music, click the **Browse** button, select an audio file and click **Upload**.

The music will be enabled within 10 minutes. Click the  treble clef to enable / disable this feature.

Emergency Calls

This page contains the information about your location. In case of an emergency call, this information will be processed by the PSAP and the police / fire department / ambulance will receive all required information about your location.

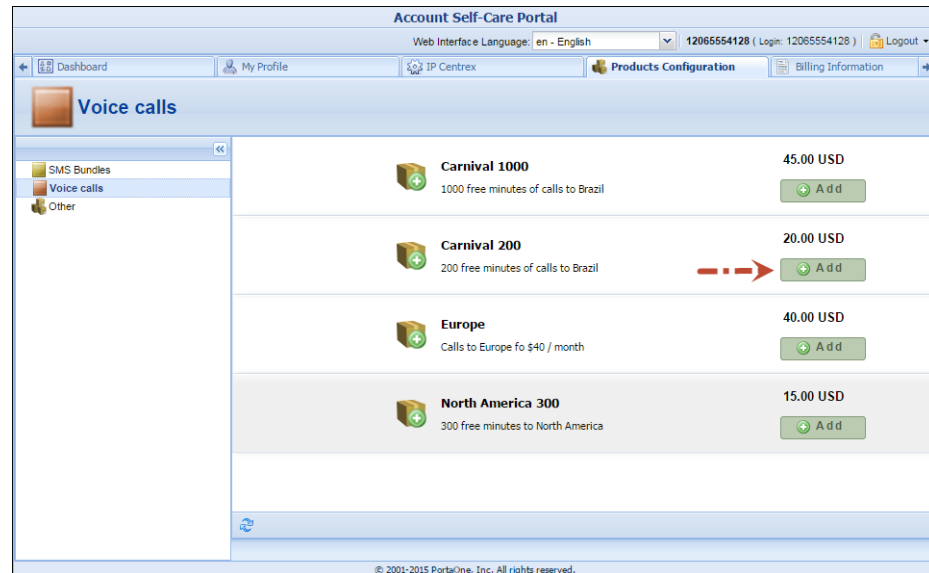

Products Configuration tab

This tab contains information about all available add-on products for your account. The add-on products are organized in groups that are visible on the left-hand side of the page. The right-hand side of the page contains all of the add-ons that belong to a corresponding product group.

The add-on products that do not belong to any product groups can be found in the default group **Other**.

All available (not yet assigned to you) add-on products are at the top of the list, and already assigned products are at the bottom of it.

Field	Description
Add	Allows the inclusion of new add-on products to the current products configuration.
Remove	Allows the exclusion of existent add-on products from the current products configuration.
Activation Fee	A one-time fee applied when the subscription is activated.
Recurring Fee	Fees that are applied while a subscription is active.
Cancellation Fee	If the subscription is cancelled before the end of the minimum subscription period, a one-time fee is applied.
Minimum Subscription Period	Time interval (in months) during which the subscription must be active so as to avoid penalties.

Billing Information tab

Billing Summary

On this page you can view your billing information arranged in four information panels:

- Brief Billing Information
- Transactions Totals Information
- Active Subscriptions
- Product & Discounts Information

The screenshot displays the 'Account Self-Care Portal' interface. At the top, it shows the user's balance as 0.00 USD and the web interface language as English. The main navigation bar includes links for Dashboard, My Profile, IP Centrex, Products Configuration, and Billing Information. The 'Billing Summary' page is active, showing a sidebar with links to Billing Summary, Subscriptions, Transactions, Volume Discounts, Top-up Account, and Mobile Payment Transfer. The main content area is divided into four panels:

- Brief Billing Information:** A table showing Type (Credit), Balance (0.00 USD), Refunds (0.00 USD), Non Call Related Charges (0.00 USD), and a 'Recharge Using Voucher' button.
- Transactions Totals Information:** A table showing From (2014-08-10), Till (2014-11-10), Usage Charges (0.00 USD), Total (0.00 USD), and Total Transactions (0).
- Active Subscriptions:** A table with columns for Subscription, Periodic Fee, Start Date, and Finish Date. It currently shows 'There is no data to display'.
- Product & Discounts Information:** A table showing Main Product (SmartCall), Add-on Products (Asia-100, USA & Canada), and a list of services with their respective discounts and expiration dates.

Field	Description
Brief Billing Information	<p>This reflects billing information such as available funds (or balance), refunds and charges information.</p> <p>You can also recharge your phone (account) using a voucher here. To do that, click the Recharge Using Voucher button and fill in a valid voucher number.</p> <p>Note, that balance information and the Recharge Using Voucher button are only displayed for phone lines which have individual balance control.</p>
Transactions Totals Information	<p>This reflects your total transactions (calls, payments, refunds, subscription charges, etc.).</p>

Active Subscriptions	This shows you the subscription plans that currently apply to you.
Product & Discounts Information	This displays information about your current products (main and add-on ones) and discounts.

Products and Services

This page presents information about subscription plans that apply to the account, subscription plans' recurring fees and "billed till" dates.

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays the balance as 31.24 USD and the user's login information (12121278911). The main navigation bar includes links for Dashboard, My Profile, IP Centrex, Products Configuration, and Billing Information. The 'Products and Services' section is active, showing a list of services: 'EasyCall plus' with a fee of 10.00 USD and a billed till date of 2015-02-28, and 'IPTV' with a fee of 25.00 USD and a billed till date of 2015-02-28. A summary at the bottom indicates 2 total subscriptions active now, with a total periodic fee of 35.00 USD.

Transactions

Transactions (calls, payments, refunds, subscription charges, etc.) serve as the primary record of services provided to you.

This page allows you to view and download transaction records – for any desired time period.

The screenshot shows the 'Account Self-Care Portal' interface with the 'Transactions' section active. The balance is 1.14 USD and the credit limit is 100.00 USD. The user's login information is 16041235005. The main navigation bar includes links for Dashboard, My Profile, IP Centrex, and Billing Information. The 'Transactions' section is active, showing a list of transactions. A filter section is visible, allowing users to select a date range (From Date: 2014-03-06, Till Date: 2014-04-07) and a service (All). There are checkboxes for 'Show Failed Transactions' and a 'Show Records' button.

On the **Transactions Filter** page you can make an extensible search via:

- A date and time range by clicking the  **Calendar** icon.
- A certain service type.

Set the from / to dates by clicking the  **Calendar** icon and click the **Show Records** button. The result page contains a summary and tables list all calls and accompanying charges from a specified time period. If you want to view additional information (charged quantity and amounts due) for the chosen the service(s), click the  **Show Details** button.

Service	Total Transactions	Charged Quantity	Charged Amount	Show Details
Subscriptions	1		0.07000 USD	
Voice Calls	3	64 (minute)	1.06667 USD	
Total Service Used:	2			
Total Transactions:	4		Total Charged Amount:	1.14 USD

Click the  **Download** icon to download Transaction Detail Records in the .csv format.

Volume Discounts

This page displays all *active* discounts assigned to a user's account. This clearly shows which discount the end user will receive when making a call or consuming traffic, as well as what volume of services is still available with a discount. To display *inactive* volume discount plans, the **Inactive** check box must be selected.

Information about volume discounts' usage history can be obtained in the **Discount History** dialog box, which is available by clicking the  **History** button.

Ok

Field	Description
Inactive	Displays the volume discounts with <i>Consumed/Used up</i> or <i>Not Yet Active</i> status applicable to the account.
Service	A specific service (voice calls, messaging, data transfer, etc.) that this volume discount will apply to.
Destination Group	Information about discounts used and remaining is shown, grouped by destination group names. Each name represents one group included in the volume discount plan assigned to you.
History	Invokes a dialog box which shows extended information about the discount plan.
Discount Plan	The name of the volume discount plan applicable for this customer.
Precedence	This is the priority level for the currently used discount plan that specifies the order in which certain discounts are to be applied. Discounts with higher priority take precedence over discounts with low priority.
Combined Discount	Shows the total discount value currently applied to the customer that resulted in the discounts' combination.

Used / Remaining	Shows the current value of both consumed and remaining discount volume (in minutes or funds). The progress bar graphically reflects how much of the discounted service has been consumed.
Expiration	Shows the time left for the discount to be reapplied to the account. If Never is defined, it means that this discount is for one-time use and will not be reapplied to the account.
<i>Discount History</i>	
Status	The current status of the discount plan: <ul style="list-style-type: none">• Active Discount Plans – The discount plans that are currently in use.• Consumed – The discount plans that have already been used up.• Not Yet Active – Currently inactive discount plans.
Current Discount	The value of the discount currently applied to the account.
Expiration	The time left for the discount plan counters to be reset.
Combine With Other Discounts	Shows the way this discount plan is combined with other discount plans applicable to a session.

Top-up Account

On this page you can recharge your phone (account) using a voucher. To do that, fill in a valid voucher number and click **Recharge**.

Mobile Payment Transfer

The **Mobile Payment Transfer** page allows you to transfer funds from your phone (account) to mobile numbers all over the world.

Please consult the [How to...](#) section for more information.

Make a Payment

This page is available only if this functionality is enabled by your provider. On this page you can see your current balance and top it up by choosing one of the available payment methods.

The list of currently supported payment methods is the following:

- **Credit or Debit Cards** – Allows you to pay using your credit or debit card. If you have a credit card whose payment characteristics are recorded in the system, it will be used by default.

- **Bank account (eCheck)** – Allows paying from your checking bank account.
- **Direct Debit NL** – Allows you to perform financial transaction in which you withdraws funds from a bank account.
- **PayNearMe** – Allows you to pay for services in cash at any 7-Eleven or ACE Cash Express store across the United States. You need to specify your email to get a PayNearMe payment slip via email and then print it. The payment slip contains the bar code to be scanned at a 7-Eleven or ACE Cash Express location. You pay cash to the store clerk, who then records the transaction – the payment information is immediately delivered to the service provider via the PayNearMe network. PortaBilling® records the transaction and updates your balance so you can immediately start using the service.

To make a payment, select the desired payment method (one of the listed above), specify the amount you wish to pay and click the **Pay Now** button to proceed with the payment.

Pay Now

☐ Bank account (eCheck)

Paying from your checking Bank Account

☐ Direct Debit NL

A direct debit is a financial transaction in which you withdraw funds from a bank account.

☐ PayNearMe

With PayNearMe you can now buy online and make payments with cash at more than 8,200 stores nationwide

Taxes upon payment

If you use prepaid services, the taxes for such services are calculated and added to the amount you are topping up your account by. After you confirm your payment, your balance is topped up to reflect that actual amount.

Payment Info

This page is available only if this functionality is enabled by your provider. This page allows you to set up the following parameters for automated periodic payments.

The screenshot shows the 'Account Self-Care Portal' interface. At the top, it displays the balance as '0.00 USD' and the user's login information: '12126505550 (Login: 12126505550)'. The navigation bar includes links for 'Dashboard', 'My Profile', 'IP Centres', and 'Billing Information'. The 'Payment Info' section is active, showing a sidebar with links to 'Billing Summary', 'Subscriptions', 'Transactions', 'Volume Discounts', 'Top-up Account', 'Mobile Payment Transfer', and 'Make a Payment'. The main content area is titled 'Preferred Payment Method' and offers three options: 'Credit or Debit Card' (selected), 'Bank account (eCheck)', and 'Direct Debit NL'. The 'Credit or Debit Card' option shows details for an American Express card, including the card number, cardholder name, and expiration date. The 'Bank account (eCheck)' option shows a 'Paying from your checking Bank Account' section. The 'Direct Debit NL' option includes a note about direct debit being a financial transaction. Below these options is an 'Auto-Payments' section with a 'Pay' checkbox and two input fields for the payment amount and the threshold balance. The 'Save' button is at the bottom.

In the **Preferred Payment Method** block you can choose which type of payment method to use.

To set up automatic payment with a debit or credit card when the balance crosses a specified threshold, select the **Pay** check box and specify the threshold in the second field. When the balance crosses this threshold the credit card will be charged for the amount specified in the **Pay** field.

Taxes upon payment

If you use prepaid services, the taxes for such services are calculated and added to the amount you are topping up your account by. After you confirm your payment, your balance is topped up to reflect that actual amount.

3. How to ...

... define a time period using the wizard?

With the Period Wizard, you can easily define the time period for which a number (e.g. a follow-me number) will be used. If you want the number to be permanently active, click the **Always** button at the bottom of the **Period Wizard** page. Otherwise, define the desired period. (Times given are based on a 24-hour clock, i.e. 8 p.m. is the same as 20:00.) The Period Wizard is intuitive and lets you configure multiple time intervals from a single page in just a few mouse clicks.

Example 1

This example illustrates the process of creating a period within the Monday–Friday workweek that starts at 8 p.m. and lasts until 8 a.m. the next morning:

The screenshot shows the 'Account Self-Care Portal' with the 'Period Wizard' page. The top navigation bar includes 'Dashboard', 'My Profile', 'IP Centrex', and 'Billing Information'. The left sidebar lists various services like 'General', 'DIDs', 'Phone Book', 'Dialing Rules', 'Incoming Calls', 'Forwarding', 'Call Screening', 'Call Recording', 'Conferences', 'Voicemail', 'Faxes', 'Auto Attendant', 'DISA', 'Call Barring', 'Identity', 'Music On Hold', and 'Emergency Calls'. The 'Forwarding' section is expanded. The main area contains the 'Period Wizard' form with the following fields and options:

- Start Time:** 20 : 00
- End Time:** 08 : 00
- Day of the Month:** (Empty field with example: 1, 3, 7, 14-23)
- Select All Days:** (Button)
- Select All Months:** (Button)
- Days of the Week:** Sunday (unchecked), Monday (checked), Tuesday (checked), Wednesday (checked), Thursday (checked), Friday (checked), Saturday (unchecked).
- Months:** January (checked), February (checked), March (checked), April (checked), May (checked), June (checked), July (checked), August (checked), September (checked), October (checked), November (checked), December (checked).
- Include New Period:** (Button)
- Time Periods:** (Empty list with message: 'There is no data to display')
- Finish:** (Green button)
- Cancel:** (Red button)

1. Open the **Period Wizard** page.
2. In the **Start Time** box, select **20:00**.
3. In the **End Time** box, select **08:00**.
4. In the block containing days of the week, select **Monday, Tuesday, Wednesday, Thursday, Friday** check boxes.
5. In the block containing months, click the **Select All Months** button.

Example 2

This example shows how to create a period that starts at 6 p.m. every day and lasts until 6 a.m. the next morning. Another interval is used for

weekends (24 hours). We will also include major holidays, e.g. January 1 and December 24–26.

1. Open the **Period Wizard** page.
2. To create a period that create a period that starts at 6 p.m. every day and lasts until 6 a.m. the next morning, follow these steps:
 - a. In the **Start Time** box, select **18:00**.
 - b. In the **End Time** box, select **06:00**.
 - c. In the block containing days of the week, click **Select All Days** button.
 - d. In the block containing months, click the **Select All Months** button.
 - e. Click the **Include New Period** button, and this time period will appear in the **Time Periods** panel on the right side of the page.
3. To include weekend periods, follow these steps:
 - a. In the **Start Time** box, select **00:00**.
 - b. In the **End Time** box, select **23:59**.
 - c. In the block containing days of the week, select the **Saturday** and **Sunday** check boxes.
 - d. In the block containing months, click the **Select All Months** button.
 - e. Click the **Include New Period** button.
4. To include January 1st in the period definition, follow these steps:
 - a. In the **Start Time** box, select **00:00**.

- b. In the **End Time** box, select **23:59**.
 - c. In the **Day of the Month** field, type “1”.
 - d. In the block containing months, select the **January** check box.
 - e. Click the **Include New Period** button.
5. To include December 24–26 in the period definition, follow these steps:
 - a. In the **Start Time** box, select **00:00**.
 - b. In the **End Time** box, select **23:59**.
 - c. In the **Day of the Month** field, type “24-26”.
 - d. In the block containing months, select the **December** check box.
 - e. Click the **Include New Period** button.
6. Click **Finish** to complete the time period definition.

... configure call screening?

On the **Call Screening** page you can define and view a list of rules for handling incoming calls.

The following example will teach us how to reject calls from unwanted numbers. To do this, a new rule will need to be created.

Click the **Add new rule** button to start.

Three sections will appear; there you can create filters for time, callers, callees and assign a particular action.

© 2001-2015 PortaOne, Inc. All rights reserved.

1. Choose the **Action** that will be applied to the rule. In this case it is **Reject**.
2. From the Time Filter field, select. **Anytime** (It is not necessary to create a new time filter since we want to reject calls from unwanted callers 24/7). If you want to define a different time period, select **Create New Time Filter** and click the  **Period Wizard** icon. Please see the [How to define a time period using the wizard?](#) section for information about how to use the Period Wizard.

The screenshot displays a web interface for configuring call filters. It is divided into three main sections:

- Time Filter and Action:** Contains three fields: "Enable Rule:" with a checked checkbox, "Action:" with a dropdown menu set to "Reject", and "Time Filter:" with a dropdown menu set to "Anytime".
- Caller's Number Filter:** Contains four fields: "Caller's Number Filter Group:" with a dropdown menu set to "Create Callers Number Group", "Filter Group Name:" with a text input field containing "Unwanted Numbers", "Number:" with a text input field containing "Enter the Number" and an "Add" button, and "Number List:" which displays a list of two numbers: "12065557788" and "12065553623", each with a red 'X' icon to its right.
- Incoming Number Filter:** Contains one field: "Incoming Number Filter Group:" with a dropdown menu set to "Any of my numbers".

3. Since you want to reject calls from certain numbers, you need to create a **Caller's Number Filter** group. To do this, fill in the **Filter Group Name** field. In this case the group's name is **Unwanted Numbers**. To add a number to the group, enter the phone number and click the **Add** button. Repeat this step for each new number you wish to add to the group.

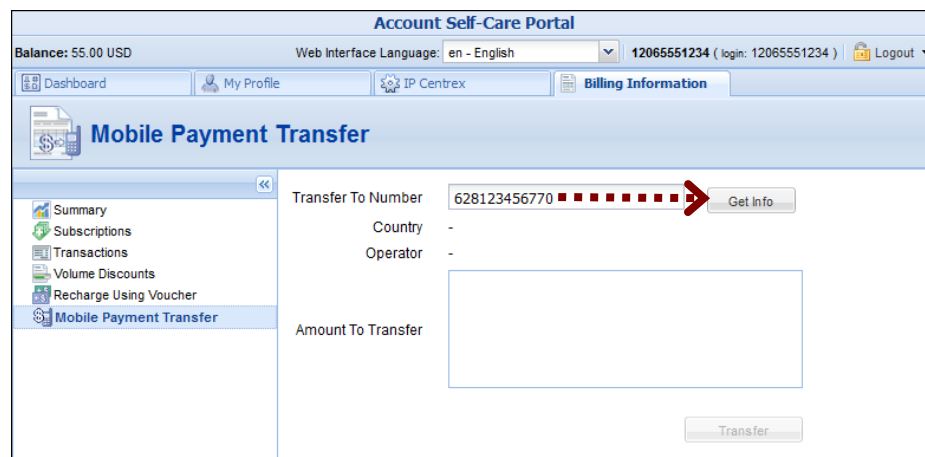

NOTE: If you need to add a group of numbers starting with the same prefix, use the % character at the end to specify that the current string is the prefix.

4. You might have aliases or an extension assigned to your account. The **Incoming Number Filter** section helps adjust the settings for them. In this case we want to apply the above rule to all numbers, so select the **Any of my numbers** option.
5. Click the **Save** button. After this you can see the conditions of the rule and its working status.

... transfer funds to mobile numbers?

Input the desired number to the **Transfer To Number** field. Note that the number must be entered using the international mobile dialing format (+ followed by the country code and then the rest of the number). For example, +12065551234 for a US number or +44712345678 for a mobile number in the UK. Then click the **Get Info** button to see how much you can transfer to the specified mobile number and how much you will be charged for this.

In the **Amount To Transfer** list, choose the desired amount to transfer and click the **Transfer** button.
